Background. The need of moving financial investments towards green and environmentally sustainable projects has attracted both institutional and private investors in recent years. How to finance the sustainable transition of economies, finding feasible incentives and promoting green products to attract funds, has become a priority. Green Bonds - and other forms of bonds such as Blue Bonds, Climate Bonds, Sustainability Bonds, Green Securitization, etc - are key financial tools to address the new challenges.

The Workshop aims to bring together theoretical and applied researchers to discuss ongoing advanced research on green bonds and other forms of impact investing. We invite researchers in this area to submit their papers for presentation and particularly encourage the attendance of doctoral students, young researchers and professionals who are willing to advance their knowledge on green bonds and impact investing research.

Keynote Speaker: Professor Caroline Flammer (Boston University and Columbia University).

There are no registration and submission fees. In case of more than one author, the name of presenter should be underlined. Please specify whether the presenter will be onsite or online.

SUBMISSION DEADLINE: March 1st, 2022

NOTIFICATION OF PAPER ACCEPTANCE BY: March 20th, 2022
